- Ingredient Availability
- Lack of Interactivity

OBJECTIVES:

- Enhance user experience with, diversify recipe Offerings, improve ingredient accessibility, and improve ingredient accessibility

TOOLS USED

Front-end	Back-end
HTML	PHP
CSS	Wordpress
Bootstrap	

WEBSITE OVERVIEW

The screenshot displays the WordPress Admin Dashboard with the ACF (Advanced Custom Fields) plugin interface. The top navigation bar includes the ACF logo, tabs for 'Field Groups', 'Post Types', and 'Taxonomies', and a 'More' dropdown. A purple banner promotes 'Unlock Extra Features with ACF PRO'. The left sidebar contains standard WordPress navigation links, with 'ACF' highlighted. The main content area shows the 'Field Groups' page with a '+ Add New' button. Below this, a table lists the active field groups. The table has columns for 'Title', 'Description', 'Key', 'Location', and 'Fields'. One field group, 'About US', is listed with a key of 'group_66367a7c6c560' and is located on the 'Pages' location. The table also shows '1 item' and a 'Bulk actions' dropdown. At the bottom, there is a blue banner for 'Unlock Advanced Features and Build Even' and a Windows activation watermark.
